Internet Evangelism is a ministry that requires passion and dedication – not just technical skills. And, with the changing face of Internet and email communication, sharing Christ online now also requires a working knowledge of how current Internet legal issues and privacy policies affect ministry online.

Recognizing the importance of legal matters to Internet Evangelism practitioners, the Internet Evangelism Coalition annual meeting **September 14-15 in Chicago** will feature an attorney who specializes in intellectual property rights and other Internet legal questions. In addition, participants will learn more about a new international Internet Evangelism network, how to use the Internet and computers in effective cross-cultural ministry, and the role of technology in sharing the gospel around the world especially to those who have never heard the name of Jesus.
